

## ORIANA - CUTTING CORRECTION

Below replaces steps 1 - 4 in the printed pattern.

1. Choose (13) fat quarters that will be used for the background pieces (Template C). From each, cut (1)  $2\frac{1}{2}$ " x at least 21" strip to use in step 2. Set aside the remaining fabric pieces to use with Templates B and C.
2. For each of the (12) pieced circles that will be made using Template A, cut (6)  $2\frac{1}{2}$ " x at least 21" strips. You should now have (72) total strips including the pieces from step 1. Set aside any remaining fabric for later use. We suggest arranging as you cut using a design wall or large surface to determine the layout you want before sewing the strips/quilt top together.
3. From the fabric reserved for the background in step 1, use Template C to cut (13) C shapes. Add each to the design wall as you work to sort out the color layout. See note in getting started about tracing templates onto fabric before cutting.
4. With any reserved fabric from steps 1 and 2, use template B to cut (26) pieces to fill in the right and left sides of each background piece (C shape) which also completes the circle (A shape).

Continue with step 5.
